BOUGAINVILLEAS and TROPICAL HIBISCUS are my favorite plants, both have similar requirements - WARM temperature, GOOD drainage, rich soil, frequent fertilizing with complete plant food, plenty of water but not soggy, and all the SUN possible. I had several plants of each in my bedroom by East and South windows last winter and they bloomed all most all the time. They bloom all along through out the year and since they bloom on new growth you can prune them all you want too. The plants listed below are blooming size plants and very nice. I like to pot them in large pots or cans and take them outside in their containers in the summer, and bring them inside before frost. The Bougainvilleas vary in color as to the amount of sun they receive, outside in full sun they are very dark, inside they are medium color. But very beautiful in all locations. The Bougainvilleas shed their leaves once in a while, sometimes when shipped sometimes because they want to rest. I mention this because many plants are thrown away for dead, when they are only resting. Water lightly and keep in warm place they will soon put out new limbs at all most every where there had been a leaf and start blooming soon.

All Plants are STATE INSPECTED

All plants are well rooted. I do not sell unrooted cuttings.

All plants are healthy and are wrapped carefully so they will arrive in good condition. After roots are carefully wrapped in damp moss and plastic to keep them damp, the entire plant (each Plant seperately) is rolled in newspaper, then they are packed carefully in hard cardboard boxes. You will be pleased with the plant you unpack. If plants should wilt after potting, I find to cover them with plastic, keep in the shade in a warm place a few days and they will perk up.

If for any reason you are not pleased with any plant , YOU MUST RETURN THAT PLANT THE SAME DAY YOU RECEIVE IT BEFORE ANY ADJUSTMENT WILL BE MADE.

Be sure and add 30% for postage

Please add 10c on each order for Postal Insurance, or I can not replace plants if they are lost or damaged in the mail.

I appreciate all orders and try very hard to please you. I only ship plants I would be glad to receive.

THANKS for requesting My list.
